Hardware Tested for Use with Hub

The features of network hardware products can vary heavily between models. Some products even display performance which differs from what the manufacturers may advertise and document.

Since unexpected poor performance can severely inhibit Hub's plug-and-play setup and fast synchronization, we constantly test many different products in Hub demo environments. This document lists the products which have performed well in 30-day tests (whitelist) as well as those which did not allow normal Hub operation.

Whitelist

These products have all completed 30-day testing with Hub and passed without issues.

Routers

- Apple AirPort Extreme
- Asus RT-AC88U
- Asus RT-AC3200
- Asus ROG Rapture GT-AC5300
- Cisco RV130W
- D-Link EXO AC2600
- DrayTek Vigor2925ac
- Fortinet Fortigate FWF 60 E
- FritzBox 6490
- FritzBox 7490
- Lancom 1781VAW
- Linksys EA9500
- LINKSYS WRT 1200 AC
- Synology RT2600ac

Switches

- Cisco SG200
- HP OfficeConnect 1810 Series
- HP OfficeConnect 1820 Series Switch J9979A
- Level One GSW-2457
- NetGear Prosafe

Blacklist

These products could not be successfully set up Hub and are not recommended for use in the network.
