Digital chairside dentistry. Redefined.

For CEREC users, it’s simple: CEREC makes even the best dentists better.

With a new, best-in-class milling unit and highly automated, intuitive software to go with the CEREC Primemill, there’s never been a better time to future-proof your practice with CEREC.

The all-new CEREC. Now is the time.

CEREC users will tell you going digital was a great decision, but until they did it they too sometimes had doubts. Would everything go smoothly right away? No. Could they learn to handle the technology? Absolutely. What about the quality of restorations? Outstanding in every way.

The latest generation of our CEREC system sets new standards so you can offer patients an unmatched combination of single-visit dentistry and excellent quality. After 35 years of continuous optimization, CEREC gives you the options you need to treat multiple indications with the confidence that comes from outstanding results.

A unique solution designed for superior digital dentistry.

The CEREC system comprises world-class components that interact perfectly ensuring seamless workflows. CEREC Primemill quickly delivers highly accurate scan data to the new CEREC Software 5, supporting you with patient-specific proposals based on the patented biojaw algorithm. But the powerhouse of the system is the new CEREC Primemill. With this state-of-the-art milling unit, digital chairside dentistry is faster, easier and more reliable than ever before.

Excellence made easy

CEREC Primemill

**Speed**
Super Fast milling mode
Engineered for speed and precision, the new CEREC Primemill inherits the proven strength of its predecessor and raises its powerful performance to entirely new heights. You can now mill zirconia restorations in Super Fast mode in around 5 minutes, cutting processing time by more than half.

Fast Grinding
Improved fast grinding mode for high quality glass ceramics restorations in less time.

**Convenience**
7" touch interface with user guidance
The new touch interface is specifically designed with delegation and integration in mind. Not only does it guide users through every workflow, it also leads them step-by-step through key maintenance procedures and other routine tasks.

Integrated block scanner
This time-saving new feature automatically scans material blocks with compatible data matrix codes and records the information, including type, size, color and zirconia enlargement factor.

**Quality**
New components for quality
A combination of new electronics, software, motors and mechanical components contributes to finer resolution and enhanced dynamics. This results in outstanding restoration margins and surface details – for extremely precise results.

New 0.5 mm milling tool
This highly accurate new tool reliably delivers first-class clinical results. Switch to Extra Fine milling mode for a higher level of detail with occlusal fissures and interdental areas on bridges.

**Versatility**
Best-in-class milling and grinding options
Choose from the full spectrum of machining options, including dry and wet milled zirconia, or wet grinding of glass and hybrid ceramics.

Wide selection of materials
No matter the indication, with the CEREC Primemill you can select from a broad range of material options from validated partners.

**Designed to stand out – and fit in**
The new CEREC Primemill doesn’t just communicate seamlessly with other CEREC devices. For their sleek design, it’s likewise the perfect match – and the ideal look for a progressive dental practice.

- The innovative LED stripes indicate unit status and milling progress.
- The new drawer design ensures direct access to tools and accessories.
- All surface areas and the chamber are easy to clean.
