Azento™
Single tooth replacement

New ground-breaking solution for clinicians

The Azento™ solution for clinicians includes:

- Instruments and drills
- Case-specific implant and a custom Atlantis Healing Abutment
- Optional provisional restoration
- Planning- and surgical service for the clinicians through an intuitive web
- Preferred lab partners access through Case Management Portal

Grow your laboratory today

Discover a new service driving customers your way: introducing the Azento™ solution with rewarding Partner Laboratory Workflow.

Expand your business by integrating your laboratory to a streamlined custom implant and provisional restoration solution for dentists:

- Seamless access to new connections among implant dentists
- Enables clinics to find and choose you for the final restoration and upload files directly to your laboratory
- Easy access to digital data enables you to provide higher quality restorations

Final restoratoin installation

The case management portal allows implant dentists to search, request and connect with partner laboratories and search by name, zip code or city to initiate a connection. By opting in to the online laboratory directory you make it simple for implant dentists to connect with you for the final restorations. Make sure you are listed too.
