Intego Pro

Performance you can rely on

The Intego Pro treatment center is available with an integrated, comprehensive infection prevention concept for efficient and safe Chairsides processes. The EasyTouch touchscreen ensures an easy and intuitive operation. Moreover, the flexible comfort assistant element is suitable for two- or four-handed treatments. Finally, Intego Pro is available as TS or CS model - so you can choose your preferred way of working.

NEW! Product Spotlight

Full dentures with inLab SW 20.0 - Simply digital

From inLab SW 20.0, the indication "Denture" is integrated in the software module Removables*. This provides the dental laboratory with a simple and fast access to this digitalized field of application. From the accurate capture of bite registration with the inEos X5 extraoral scanner, to an automated and careful model analysis, to the initial proposal of the tooth set-up and the design of the denture base – the inLab Software offers coordinated process steps combined with a high level of user comfort. The laboratory also remains flexible in the subsequent production options.
