The SmartFix® concept

Quick, safe and cost effective solutions for edentulous patients

SmartFix is a concept that helps patients enjoy life again and it works with all three implant systems offered by Dentsply Sirona Implants— Atlantis, Astra Tech Implant System EV, and Xive.

It's also the answer to a growing patient need for full-arch, implant-supported restorations.

Just like everyone else, edentulous, or soon-to-be edentulous, individuals want to enjoy life to the fullest. Sadly, many of them suffer from poorly functioning and painful dental prostheses. SmartFix handles these problems and offers a quick, safe and cost-efficient way to improve quality of life.

In short, by using a well-proven treatment method, the SmartFix concept lets clinicians provide a patient with an immediately fixed reconstruction and a full-arch restoration on only four dental implants. By tilting distal implants, the use of available bone is optimised and the proximity to anatomical structures reduced.

Another upside of the procedure is that longer implants, rather than an increased number of implants, can be placed to properly

distribute prosthetic load and avoid cantilevers.

For patients, the benefits with the SmartFix concept include improved confidence and quality of life thanks to excellent function and aesthetics, fully functioning temporisation on the day of the surgery, fewer visits to the clinic which equals lower costs, and a reduced need for invasive surgery like bone grafting and other advanced procedures.

Clinics also stand to gain a lot from adding the SmartFix concept to their offer. There's little need for special training as the treatment is less surgically complex. The concept offers a streamlined work flow and standardised procedures that improve productivity and profitability. And, as research shows a growing patient

The SmartFix concept lets clinicians provide a patient with an immediately fixed reconstruction and a full-arch restoration on only four dental implants.

need for full-arch, implant-supported restorations, the SmartFix concept is a sure way for clinics that want to grow their business and attract new groups of patients.

In summary, the SmartFix concept is a true win-win for all parties. Clinics can meet a growing demand with a solution that provides excellent aesthetic and functional results, while patients get a quick, safe and cost-efficient treatment to improve their quality of life.

Atlantis®

Patient-specific CAD/CAM Abutments for Atlantis

Atlantis Abutments take into consideration patient-specific biology, anatomy and engineering principles. Unlike standard Abutments, they are individually designed and produced to fit unique edentulous spaces and the surrounding teeth and soft tissue.

Atlantis is comprised of a unique combination of four key features known as the Atlantis Abutment BioDesign Matrix. These features work together to support soft tissue management for ideal functional and aesthetic results.

Azento™ Single tooth replacement

Dentsply Sirona does not waive any right to its trademarks by not using the symbols ® or ™. © 2019 Dentsply Sirona. All rights reserved.

Some call it convenience, we call it Azento: scan, approve, treat

Azento makes the most of your valuable time by streamlining your workflow, increasing patient acceptance rates and making your everyday more convenient.

You simply scan your patient and upload the data. We then suggest a customised treatment plan, which you review and approve.

After this, you receive a box with everything needed for the treatment, including the plan, surgical guide, instruments and drills, a case-specific implant, an Atlantis custom healing abutment and, if you want, a provisional restoration.

What is OSSIX® Volumax?

OSSIX® Volumax is a volumising, ossifying collagen scaffold, featuring GLYMATRIX technology*

- Undergoes rapid ossification (in CT scans and histology after one month).
- Excellent handling, easy to use, adapts and adheres to the bone.
- Thick and expands when wet.
- Safe and effective.

*GLYMATRIX Technology is a proprietary collagen cross-linking technology, similar to the naturally occurring glycation process in the human body. The technology uses sugars to cross-link collagen molecules producing a collagen matrix, which can be tailored to deliver products of varying physical properties and customised longevity.

Atlantis®

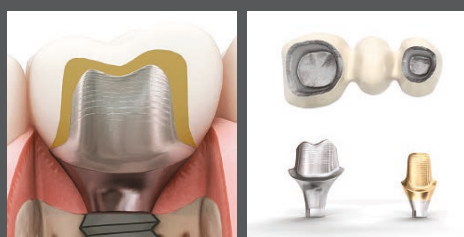

Patient-specific CAD/CAM Abutments for Astra Tech

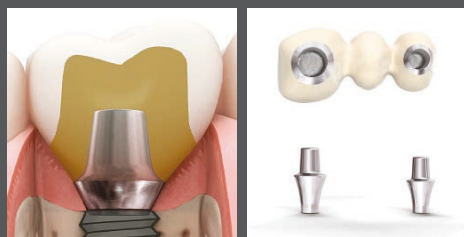

Atlantis Abutments take into consideration patient-specific biology, anatomy and engineering principles. Unlike standard Abutments, they are individually designed and produced to fit unique edentulous spaces and the surrounding teeth and soft tissue.

Atlantis is comprised of a unique combination of four key features known as the Atlantis Abutment BioDesign Matrix. These features work together to support soft tissue management for ideal functional and aesthetic results.

Atlantis CAD/CAM patient-specific Abutments

Atlantis
Abutments
are VAT
exempt!

Atlantis Abutments support cement-retained and screw-retained solutions on all major implant systems and provide an excellent foundation for best possible function and aesthetics.

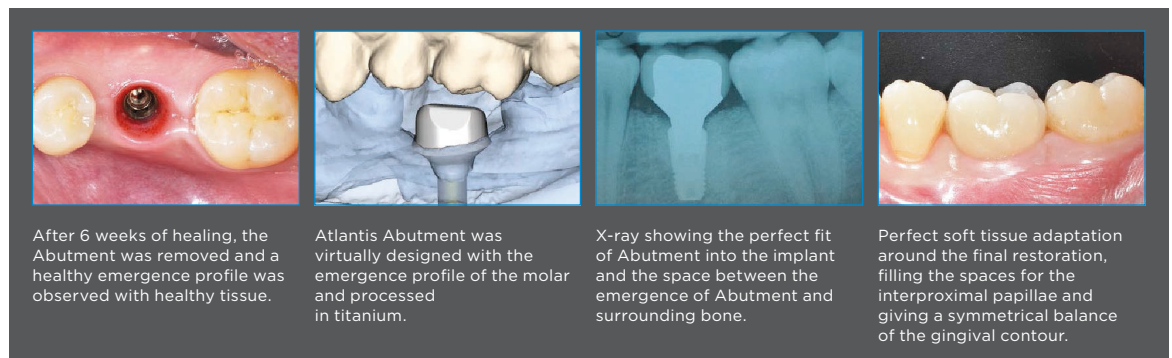

Incorporating Atlantis into the dental practice and dental laboratory provides peace of mind for both clinicians and dental technicians while allowing for increased efficiency and profitability.

The natural choice

Why should you choose Atlantis patient-specific Abutments? Because Atlantis Abutments take all the necessary design parameters into consideration for outstanding prosthetic solutions.

Through the use of the patented Atlantis VAD (Virtual Abutment Design) software, each Atlantis Abutment is individually designed from the final tooth shape taking the specific edentulous space, surrounding teeth and soft tissue anatomy into consideration. By taking these factors into account, implant prosthetics will truly mimic natural tooth function and appearance.

Atlantis is an open solution available for Ankylos, Astra Tech Implant System, Xive and all major implant systems. This means that your preferred implant system can be restored with Atlantis Abutments.

After 6 weeks of healing, the Abutment was removed and a healthy emergence profile was observed with healthy tissue.

Atlantis Abutment was virtually designed with the emergence profile of the molar and processed in titanium.

X-ray showing the perfect fit of Abutment into the implant and the space between the emergence of Abutment and surrounding bone.

Perfect soft tissue adaptation around the final restoration, filling the spaces for the interproximal papillae and giving a symmetrical balance of the gingival contour.

Freedom - restorative and material versatility

Atlantis Abutments support cement-retained and single-tooth, screw-retained restorations, in biocompatible materials including titanium, gold-shaded titanium and up to five shades of zirconia. This freedom of choice allows you to fulfill patients' requirements for excellent function and aesthetics.

Atlantis CAD/CAM Suprastructures

Atlantis
Suprastructures
are VAT
exempt!

Atlantis®

Atlantis Suprastructures offer a full range of CAD/CAM, patient-specific implant suprastructures for fixed and removable dental implant prostheses for all major implant systems.

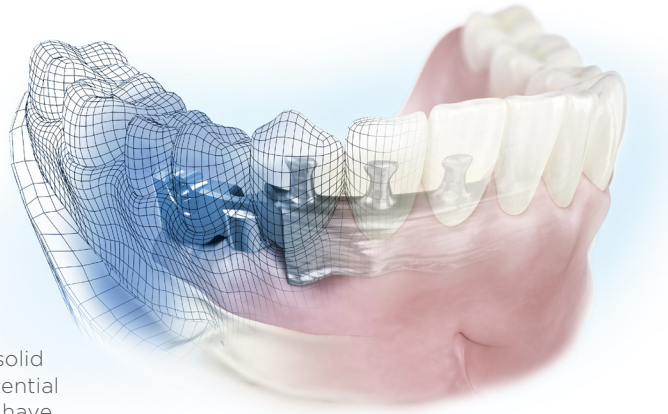

Atlantis Suprastructures are produced using the latest developments in CAD/CAM technologies, and are supported by computer based industrial and medical device expertise.

Atlantis Suprastructures bar structures are milled from solid blocks of titanium or cobalt-chrome, eliminating the potential for a porous material. Milling strategies for Atlantis bars have been optimised to produce a precise and tension-free fit, as demonstrated by the University of Sheffield, UK, in accordance with the Sheffield fitting test¹.

Atlantis Suprastructures bridges and hybrids are produced using a metal 3D printing technique in titanium and cobalt-chrome (additive manufacturing). Additive manufacturing offers different surface retention for veneering. Choices include a standard additive manufacturing surface for ceramic veneering or an increased surface area for retention of composite layering.

Atlantis Suprastructures are supplied with a comprehensive 10-year warranty.²

2. Terms and conditions apply - please see Atlantis Warranty for more details.

Removable prostheses

Atlantis Suprastructures 2in1

Provides primary and secondary suprastructures for a removable solution. The primary is fixed to Implants, while the secondary attaches to the primary using friction, and additional retention elements. The secondary can be a hybrid or bridge suprastructure finished with custom teeth and denture resin³.

Atlantis Suprastructures bar

Provides a suprastructure for removable dentures. Bars can be designed with extensions that follow the gingival profile. Moreover, they can include a combination of various attachment options. Both standard and custom-shaped bars are available, depending on case requirements.

Fixed prostheses

Atlantis Suprastructures bridge

Provides a full-Anatomical base for ceramic layering or composite layering techniques.

Atlantis Suprastructures hybrid

Provides a surface with retention elements that can be finished with custom teeth and denture resin.

Angulated screw access

Allows the prosthetic screw access channel to be Angled up to **30°** off the implant/Abutment axis, for optimal aesthetics and function.

3. Atlantis Suprastructures 2in1 is only available in titanium.

Returning a product

Following these guidelines will help us to quickly process your returned product and avoid us sending it back to you (full details can be found on the inside back page).

1

Package the product in a strong, robust box - ideally in the original delivery box (jiffy bags are not suitable for returns and may not be accepted). **Re-label the box accordingly.**

2

Ensure the product packaging is unopened as new. **Only unopened product will be accepted for exchange or credit.**

3

Ensure the product packaging is not defaced or written on. **Defaced product cannot be accepted for exchange or credit.**

4

Sterile product without at least 15 months shelf life remaining **will be returned to you.**

5

Ensure you enclose a copy of the original invoice or delivery note for us to be able to process your request.

6

If your product(s) is/are for exchange, please enclose an **'Exchange Request' form** (copies are available and can be sent to you via email upon request). Products can be exchanged within 12 months of the date of purchase.

7

Send your package using a **'signed-for upon delivery'** service.

Product returns and exchange guidelines

Products being returned for an exchange or credit **should** be:

- Unopened and sealed (as delivered), in **'as new'** condition.
- Packed in **original delivery box or similar box** to protect from damages during transit (jiffy bags are not suitable for returns and may not be accepted).
- Clearly addressed to Dentsply Sirona Implants (not via your Territory Sales Manager) at the following address:
Dentsply Sirona Implants, DENTSPLY IH Ltd, Building 3, The Heights, Weybridge, Surrey, KT13 0NY.
- Accompanied by a **copy of invoice or delivery note** and a completed **Implant Returns Advice Note form** - download or visit www.dentsplysirona.com/en-gb/help/terms-and-conditions.html
N.B. Do not affix staples, labels, or sticky tape to any area of any item, or write on/deface the packaging. We recommend using a **'signed for/special delivery'** service so that you can track your package in the event it does not arrive at the Dentsply Sirona address shown above.

Please note:

Returned products will only be accepted if they have at least 15 months shelf-life remaining.

Ossix and Symbios products that require refrigeration are not eligible for credit or exchange.

Dentsply Sirona are unable to credit or exchange products redeemed using your Dentsply Sirona reward points unless there is a fault with the product.

Any products supplied by Dentsply Sirona Free of Charge are not applicable for credit and can only be exchanged on a like-for-like basis.

Exchange policy

Products can be exchanged within 12 months from the date of purchase. Products will only be exchanged on a **'like for like'** basis (e.g. implant for implant, abutment for abutment), on receipt of original item(s). Please enclose a Product Exchange Form, listing the replacement items required. A copy of either the original invoice or delivery note will also be required for an exchange. If this paperwork is not included, the item(s) will be returned to you. **Please do not attempt to order a replacement item online or by phone without first returning the item using the process above. If this is not adhered to, we reserve the right to charge the current RRP.**

Please note: Returned products will only be accepted if they have at least 15 months shelf-life remaining and are in a resaleable condition.

Returns policy

Non damaged products must be returned within **30 days of the invoice date for a credit to be issued**. A credit will not be processed without a copy of either the original invoice or delivery note. Damaged products should be notified within 3 days from receipt of delivery and returned for further investigation.

Please note: Returned products will only be accepted if they have at least 15 months shelf-life remaining and in a re-saleable condition.

Any returned/exchanged items not compliant with the above Guidelines & Policy may result in the items being returned to you.

Dentsply Sirona reserves the right to remove any Dentsply Sirona Rewards points earned on cancelled or returned orders.

Please note: All Atlantis and Simplant products listed are excluded from the above conditions of sale, for information on delivery times, postal charges and returns please call customer services on 01932 838343.
