

Triodont V3

Palodent V3

Designed by Triodont

The brand Triodont V3 in Australia and New Zealand is synonymous with enabling clinicians to create predictable, anatomically contoured contacts for your Class II restorations. As of April 2021, this easy to use and internationally proven matrix system will be branded Palodent V3 by Triodont.

Palodent V3 will have a different colour to Triodont V3, however the familiar benefits remain:

- Predictable tight contacts
- Tight gingival seal
- Less flash, less finishing
- Easy-to-use system
- EZ Coat matrices: (previously known as SuperCurve) micro-thin, non-stick coating for incredibly easy matrix removal
