

PEERS

United Kingdom & Ireland

Platform for exchange of
experience, research and science

PEERS

Lifelong learning is a core value for dental professionals worldwide

At Dentsply Sirona we embrace the importance of constant development within dental in general and implant dentistry in particular, not only in words, but also in action. To us, learning is the root from which all innovation stems. Over the past few decades dental implant hardware has been developed and fine-tuned and implant treatment methods have advanced at an amazing pace. As we know, there will always be new frontiers to explore and new discoveries to be made. History has shown us that our development and ability to innovate is most successful when collaborating with other professionals to share ideas and knowledge in an open-minded environment.

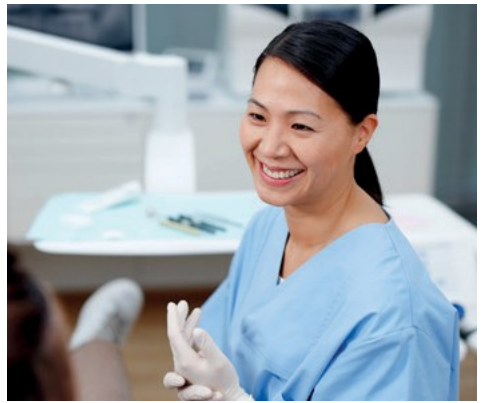

That is why Dentsply Sirona has founded PEERS – a platform fueled by a continual investment in research, learning and professional development in the area of implant dentistry. PEERS – which stands for Platform for Exchange of Experience, Research and Science – is designed to promote enhanced partnership between

Dentsply Sirona and dental implant professionals, as well as to facilitate collaboration between its members.

PEERS enables networking on a regional, national and global level. It is a platform for meetings and events, product information, expert-to-expert courses, speaker development, scientific research updates, and much more. As a member of this selective group, you will have the possibility to meet and engage in discussions with opinion leaders, receive first-hand news about the latest product developments and share your knowledge and views with colleagues.

All in all, with PEERS our ambition is to go beyond knowledge. By being part of PEERS we hope you will be inspired to find new ways of approaching everyday work situations in order to increase the quality of life for patients. And find new ways to inspire your team members.

Inspiration breeds inspiration.
Welcome to PEERS.

Exclusive content, networking and professional development

AS A MEMBER OF PEERS YOU WILL:

- Have the possibility to meet intensively with national opinion leaders – in selected small groups.
- Be invited to specially developed PEERS training & education programs, events and seminars
- Have the possibility to participate in specialized working groups and projects with varying focus
- Receive first-hand news in advance about the latest development within implant dentistry in general and Dentsply Sirona in particular
- Have the possibility to share and exchange ideas and opinions with colleagues who have the same status as you – exclusive PEERS members

With PEERS, we offer you a platform to share your valuable knowledge and expertise with other members of the network. We organize and make all the arrangements allowing you to focus on exclusive content, networking and your own professional development.

PEERS supports continuous exchange of experience and knowledge between dental professionals.
