

Free face mask packs for our US customers

As the COVID-19 crisis accelerated, the US team identified a large stock of Com-Fit mask samples that were available in the warehouse. To show our appreciation to our customers and the quality dental care they provide in our communities during the COVID-19 pandemic, the US team is sending out these Com-Fit mask samples to offices that are open and providing emergency dental care. It is our goal to vigilantly support healthy practices for healthy smiles, providing help wherever we can to make sure our dentists and dental technicians stay safe during this uncertain time.

The US field sales team is identifying dental offices that are open and in need of masks and submitting a request to the marketing team for delivery of the masks. Each office receives five sample packages of either Com-Fit Plush* ASTM Level 2 or Com-Fit Plush* Natural Fit ASTM Level 1 masks (15 masks total). The safety of the people delivering treatments to people in need is our top priority and we hope that the masks help the dentists and dental technicians to feel more secure as they fulfill their important work each day. In total 190,000 masks will be donated to around 10,500 dental offices that are treating emergency patients.
