Dentsply Sirona Launches New VPS Impression Material

In keeping with a long tradition of offering meaningful innovation to the market, Dentsply Sirona proudly introduces Aquasil® Ultra+ Smart Wetting® Impression Material. A completely redesigned VPS offering, Aquasil Ultra+ impression material merges state-of-the-art intraoral hydrophilicity and intraoral tear strength to deliver better-than-ever results—optimizing performance in all areas, not just one. The plus means clinicians do not have to choose between wettability, tear strength, speed, and delivery options.

Aquasil Ultra+ Smart Wetting Impression Material is a final VPS impression material indicated for use in all dental impression techniques and is available for purchase through approved Dentsply Sirona distributors.

A No-Compromise VPS Solution

Aquasil Ultra+ impression material provides clinicians a no-compromise solution to their final impression needs with market leading intraoral hydrophilicity and intraoral tear strength. Historically, the market has measured impression material performance outside of the clinical context in which a dentist works. Leveraging the latest technology, Dentsply Sirona tests and publishes clinically relevant intraoral performance to better empower clinicians to make clinical decisions.

Aquasil Ultra+ impression material’s market leading intraoral hydrophilicity is designed to help clinicians avoid trapping fluid from the moment the material is syringed into the moist, humid environment, helping clinicians alleviate voids and bubbles at or near the margin.

Market leading intraoral tear strength delivers a material designed to help clinicians reduce risks of tears at the margin while the material is in thin cross-sections and when being removed from the patient’s mouth, including in cases where retraction paste is used.

Aquasil Ultra+ impression material sets a standard of excellence with intraoral performance and combines it with a selection of clinically relevant work/set times and viscosity choices to provide a no-compromise product solution for single-unit crown cases and more.

Learn more about how Aquasil Ultra+ impression material can benefit the dental office at www.AquasilUltraPlus.com.
