Orthodontics

Communication is Key!

OrthoMation will allow you to expand the ways in which you communicate with your patients. It is also designed to help you reach beyond the office to provide information to parents who could not attend the initial consultation. The treatment plan you present in the office can be printed, burned to CD, or uploaded to the Internet by integrating with participating web providers.

Customize for your office

If the OrthoMation library of over 500 videos and images aren't enough, you have the ability to easily save your own images into the program. For example, if images of appliances that you use aren't in the program you can quickly add them to the library. Your images can be used like all other media in the program including becoming part of your patient's customized treatment plan.

Custom Treatment Plans

OrthoMation allows you to create Custom Treatment Plans containing diagnostic images and movies that work much like PowerPoint® presentations. When creating a plan you can easily designate it as a patient-specific (ex. John Smith) or a treatment-specific (ex. Class II Div1) plan. Once saved, your plans are quickly accessible and can be used as an educational aid throughout your patient's treatment.

OrthoMation is Case Presentation software that visually aids in the explanation of diagnostic information. Using the vast library of over 500 realistic movies and images, OrthoMation allows you to convey your message without messy drawings and clunky models. is designed to be used to explain complex information and motivate your patients throughout treatment.

User-Friendly

The layout of OrthoMation is designed to be extremely easy to use. The OrthoMation library is divided into Treatment and Diagnostic sections which you can navigate through to show images and movies. An enhanced Search function allows you to quickly find specific media when you are discussing treatment options with your patients. You can also add images and movies to the "Favorites" section for easy access chairside.

Integrate

OrthoMation integrates with several Practice Management programs, providing you the ability to create custom treatment plans from their treatment charting screens. OrthoMation also has direct integration with the VistaDent OC Imaging software, allowing you to incorporate your patient's images into your presentations.

Multilingual

OrthoMation can be installed and customized in a number of different languages such as Spanish, French, German, and Italian. The OrthoMation Introduction video is available in English, French, and Spanish.

OrthoMation Introduction Video

OrthoMation comes standard with a 6 minute video that introduces prospective patients to orthodontics and what they can expect from treatment. All the images in the Introduction can be replaced with your own custom images to make this unique to your office.
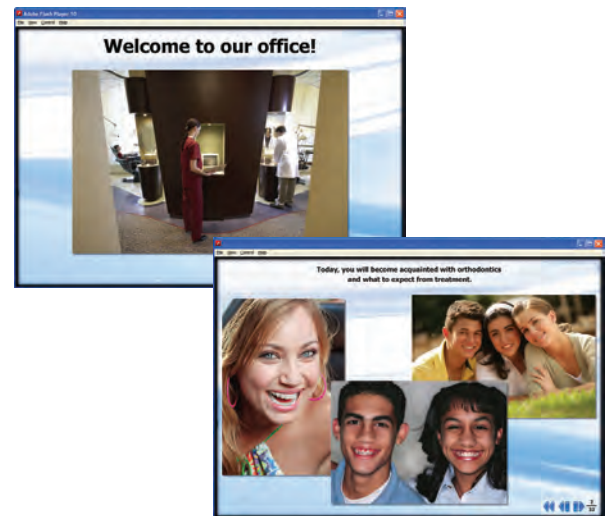

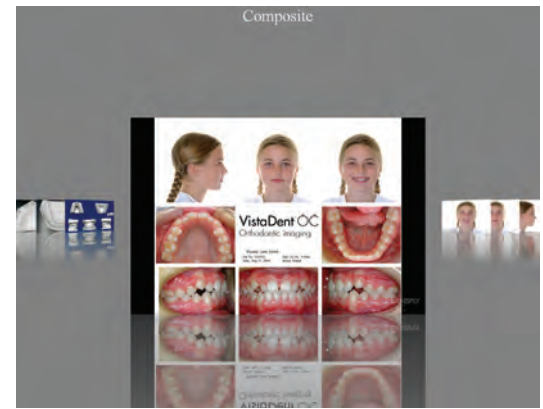

Networkable at No Additional Charge

OrthoMation is a Server-Client based application which allows you to connect multiple Windows-based workstations, per licensed location, to one central database server at no additional charge. This will allow you to "go chairside" when showing your patients OrthoMation images and movies throughout treatment.

30-Day Money Back Guarantee

Your purchase of OrthoMation is accompanied by a 30-Day Money Back Guarantee. Evaluate the software for 30 days (from the date of purchase) to see how well it works for your office. If you are not completely satisfied you can return it for a full credit*.

(*Credit cannot be obtained after 90 days from invoice date. Credit cannot be obtained if Permanent Authorization was requested/received.)
