Clearly for You... They Appear to Disappear

- ✔ Smile with confidence with crystal-clear braces
- ✔ Small, smooth and comfortable
- ✔ No aligners to take out to snack, eat or drink hot beverages

Let Your Smile Shine Through

While you're getting braces, you still want to look great and feel confident. Crystal-clear polysapphire Ovation S braces are so see-through that they appear to disappear when applied to your teeth.

Ovation S combines the esthetics of clear aligners with the convenience of braces. With smooth rounded edges, a small and slim design, Ovation S braces are designed for comfort.

NEARLY INVISIBLE

The crystal-clear polysapphire Ovation S braces are one of the most discreet ways to treat your teeth. They give you the esthetics of clear aligners with the proven performance of braces.

EFFICIENT TREATMENT

Whether you have slight crowding or need more extensive straightening, Ovation S braces can straighten your teeth quickly and effectively.

STAIN RESISTANT

The polysapphire Ovation S bracket is an incredibly strong substance. Its high-tech finish locks out stains and minimizes reflections so people notice nothing but your natural tooth color.

DESIGNED FOR COMFORT

Because the polysapphire material is so strong, Ovation S braces can be made smaller and with a slimmer design. Most people forget they're wearing them within a few hours.

“I never realized I had so many options to straighten my teeth! Ovation S gives me the esthetics I want and the peace of mind that the brackets are doing the work - not me!!”

“I knew that Ovation S was the right choice when I had to continually remind my friends that I was wearing braces. Sometimes even I forget that I'm wearing them.”
