Centralized services for

Primescan

Enjoy the scan.

“To me, Primescan sets new standards in dental scanning technology. For both me and my team, intraoral scanning is now more accurate, faster and easier to use than ever. It’s easy to handle, immediately ready to use, and integrates seamlessly into our workflow. Even patients benefit from its superior performance, since the process is so much more comfortable. Thanks to state-of-the-art technology, more data is captured in higher resolution and quickly processed in perfect sharpness and with outstanding precision, allowing indications from single-tooth to full-arch treatments. Also, due to enhanced connectivity, my practice is easily connected to our lab and other partners. So all I can say is try it for yourself – and enjoy the scan!”

Dr. Verena Freier
Dentist

“What drives me? Excellent results. And Primescan is my answer.”

Benefit from all-around satisfaction

An excellent choice for outstanding results: Primescan is your perfect starting point into digital dentistry. No matter how you want to design your workflows, Primescan is the enabler for efficient digital workflows – both chairside in your practice and with your preferred partners.

The new Primescan gives not just one new point of view but one million. The innovative Smart Pixel Sensor processes more than 1,000,000 3D points per second, producing photorealistic and highly accurate data. In fact, Primescan is the most accurate intraoral scanner on the market*. Its dynamic depth scan technology enables perfect sharpness and outstanding precision, even at a measuring depth up to 20 mm – a crucial advantage for deep indications.

What you see is what you get: Due to Primescan's ability to scan at an incredible data density, it delivers complete 3D structures of everything in its field of view – right from the very first scan.

Take control of infection: These different sleeves guarantee that you'll fulfill your practice needs as well as all general hygiene requirements. Choose from stainless steel sleeves with either sapphire glass or an autoclavable option. Single-use disposable sleeves are also available.

The new Acquisition Center is a workstation designed for modern dentistry and with the dentist in mind. It comes with a touchscreen and a 16:9 wide-format movable touchscreen, offering you a highly intuitive and ergonomic work platform.

Your benefits at a glance:
• Touchscreen and touchpad for highly convenient, intuitive use
• Kinematics for perfect ergonomic positioning
• Mobility concept for full mobility with battery buffer of more than 60 minutes

The best choice for your practice – Primescan meets your needs with two individual software configurations:

Primescan AC with CEREC Software:
• Supports chairside transfer options
• Supports secure and encrypted data transfer through CEREC Case Center Inbox
• Touch-enabled and intuitive user interface

Primescan AC with Connect Software:
• Supports data transfer options to your preferred partners
• Secure and encrypted data transfer through Connect Case Center Inbox
• Easy upgradability to full chairside workflow
• Touch-enabled and intuitive user interface
